

## Teens Cook with Heart Program (TCWH)

The American Heart Association created the Teens Cook with Heart program to educate high school students about the importance of cooking healthy, to motivate them about creating healthy recipes, and to empower them with healthy alternatives in their careers of future chefs.

### Our Focus

Teens Cook with Heart focuses on 3 major behavioral changes to combat the obesity epidemic; **increase** education about healthy cooking, **decrease** the use of ingredients high in fat, sugar, and cholesterol in their recipes, and **increase** the use of ingredients high in fiber and nutrients. Through teaching culinary students the importance of healthy cooking we expect to see improvements in the culinary world and as a result a decline in obesity in the upcoming years.

### Our Reach

TCWH program is available to all high schools that have the culinary program in the entire state of Nevada. Each year we can impact more than 5,000 high school students, plus their families and teachers.

### Outcomes

Our outcomes are not limited to:

- Decrease the number of students who believe that:
  - ✓ Cooking healthy food is expensive
  - ✓ Cooking healthy food is too time consuming
  - ✓ Cooking healthy is boring
- Decrease consumption of ingredients high in Trans and saturated fats, sodium, and sugars, in food preparation
- Increase healthy menus in their future restaurants
- Increase consumption of whole grains, better fats, and ingredients high in nutrients

## Flavors of the Heart

*Teens Cook with Heart* celebrates its accomplishments at *Flavors of the Heart* (FOTH). FOTH is a heart-healthy culinary event. Donations are a great opportunity to demonstrate your support for the American Heart & Stroke Teens Cook with Heart program. Enjoy Heart-Healthy food by renowned chefs, wine tasting and music!
